

I am a tire wholesaler. With our move to a new facility I was responsible to have all the odors removed from the old one. Tires are made from a polymer that break down over time and give off an odor that penetrates walls, floors...pretty much everything. I contacted everyone I could find on the internet to see if they were capable of removing the smells, and at a reasonable price. Most were unwilling to attempt it as they said rubber smells are particularly difficult to remove, or they wanted to charge an arm and a leg. After talking with Mark from Environmental Air Cleaning, who was great with his knowledge and gave us the guarantee we needed, we decided to go with him. Mark went over and beyond what was asked to make sure we got the results that we, as well as our landlord, needed. The service was great, timely, and Mark was a pleasure to deal with. Thank you Mark!
