Hi Rick:

I would just like to say that we have had the Odorox on our furnace for three years now and we have enjoyed its addition to our home and our lives.

Since its installation, after a two week period, I found that I was able to totally eliminate both the inhalers I used on a daily basis for asthma. I will keep one of each inhaler handy just in case.....but I have not had to use either one so far, even in winter. They expire in date far before the thoughts of using them. I find myself spreading the attributes of this product to all who will listen and most are interested in its benefits. I also mentioned it to my Doctor that had a hard time believing that something would be able to help that wasn't drug related.

I enjoy not having to use the inhalers, not losing my voice and having phlegm in my throat, and the other side effects from these drugs. In the heat of summer, my family and I also enjoy the benefits of the fan cooling off the house for a cooler sleep. We also like the way it eliminates any cooking odors as well as forest fire smoke that hinders everyone's breathing.

Thank you for this wonderful invention. I wish everyone knew about the product-especially those with lung problems!

Thank you Rick for taking such good care of us. I enjoyed your service call and our chats!

Elizabeth
